
ASSET MANAGEMENT COMMITTEE

2021 WEBINAR SERIES

12:00 – 2:00 PM.

DAY 2 – SEPTEMBER 22, 2021

Panel Discussion: O.Reg 588/17 – The Journey to Date

This Panel will discuss how Municipalities are progressing in their aim to comply with the current O.Reg 588/17 requirements and what approach they are taking to meet the future needs of the regulation. The panel will include a cross section of municipal asset managers who will reveal their successes, challenges and future dreams of their asset management journey.

Since 2018, 'O. Reg. 588/17: Asset Management Planning for Municipal Infrastructure' has been driving municipalities to implement an Asset Management approach to infrastructure management. The next milestone of the regulation is for every municipality to prepare an asset management plan for core (water, wastewater, stormwater, road and bridges) infrastructure by July 1, 2022 and all other assets by July 1, 2024. By July 1, 2025 every AMP must include a 10 year forecast with existing and targeted levels of service and a lifecycle management and financial strategy to evidence how the municipality will be financially sustainable in achieving its targets.

DAY 3 – OCTOBER 14, 2021

Levels of Service

This webinar will explore how various Municipalities are addressing Levels of Service within their Asset Management Plans, in order to comply with 'O. Reg. 588/17: Asset Management Planning for Municipal Infrastructure'. We will discuss the approaches they have taken to educate, disseminate and develop meaningful Levels of Service within their organization, that can be used to inform infrastructure investment decision making. The webinar will show how municipalities have addressed the prescribed O.Reg. 588/17 LOS measures and what additional targets they have defined. We will explore the development of these Key Performance Indicators (KPI) and their role to drive data quality and inform investment planning.

Since 2018, 'O. Reg. 588/17: Asset Management Planning for Municipal Infrastructure' has been driving municipalities to implement an Asset Management approach to infrastructure management. The next milestone of the regulation is for every municipality to prepare an asset management plan for core (water, wastewater, stormwater, road and bridges) infrastructure by July 1, 2022 and all other assets by July 1, 2024. The AMP must include the definition of Level of Service and meet several prescribed measures defined in the regulation. By July 1, 2025 every AMP must include a 10 year forecast with existing and targeted levels of service and a lifecycle management and financial strategy to evidence how the municipality will be financially sustainable in achieving its Level of Service targets
